

FOR IMMEDIATE RELEASE

New Oasis® Retractable Insect Screens Driven by [Lutron™](#) from [Insolroll](#) for High End Outdoor Living Comfort and Control

Louisville, CO, February 1, 2017— Insolroll Window Shading Systems is proud to introduce the Oasis® 2900 Retractable Insect Screen Driven by Lutron, elevating insect control in high-end outdoor living spaces to a new level of control and luxury. Advanced Lutron control compatibility makes the Oasis 2900 the most versatile insect control system for outdoor kitchens, dining rooms and patio spaces.

Fully retractable and sealed on 4 sides, the Oasis 2900 uses zipper-captured fabric edges in side channels to seal out bugs when lowered, and allows open air access when raised. These quiet, automated shades make operation easy as they allow for full integration with Lutron HomeWorks® QS and RadioRA® 2 lighting control systems.

“Our technical alliance with Lutron joins Insolroll’s outdoor shading expertise with Lutron’s patented Electronic Drive Unit,” says Rick Pease of Insolroll “This allows seamless control of our retractable insect screens through a Lutron system, or individually via the Lutron Pico® wireless remote. Outdoor living spaces can be enjoyed without bothersome flies, gnats, no-see-ums or mosquitoes that may carry illnesses, with all the comfort, convenience and personalization offered by Lutron control,” added Pease.

Moving beyond insect control, Insolroll offers fabrics that provide protection from glare, heat and UV rays, as well as translucent and weatherproof/zero openness options. These create a fully retractable enclosure for covered outdoor spaces, providing protection for occupants and furnishings from harsh weather. All fabric options also provide protection from golf balls, for golf course homes with outdoor living areas.

Oasis 2900 Retractable Insect Screens Driven by Lutron can be built-in to new construction patio structures, making them virtually invisible when retracted. For versatility and custom detailing, side track mounting options provide solutions for all types of patio materials, including brick, wood and masonry columns.

**About Insolroll Window Shadings Systems ([www.insolroll.com](http://www.insolroll.com))**

Insolroll Window Shading Systems manufactures solar screen shades to make homes and commercial spaces more comfortable, lowering energy usage through daylighting and sun control. Based in Louisville, Colorado, Insolroll manufactures specialty shading systems for residential and commercial applications. Insolroll sells Oasis® Patio Shades through a network of installing dealers throughout North America.

**About Lutron Electronics ([www.lutron.com](http://www.lutron.com))**

Founded in 1961, Lutron Electronics is headquartered in Coopersburg, Pennsylvania. From dimmers for the home, to lighting management systems for entire buildings, the company offers more than 15,000 energy-saving products, sold in more than 100 countries. In the US alone, Lutron products save an estimated 10 billion kWh of electricity, or approximately \$1 billion in utility costs per year. The company's early inventions— including the first solid-state electronic dimmer invented by Lutron's founder, Joel Spira— are now at the Smithsonian's National Museum of American History in Washington, DC.
