Insolroll® Shades are engineered to make your home more comfortable and energy efficient. Solar screen shades control the sun’s glare, heat, and UV rays while maintaining an open feeling.

Insolroll offers a wide range of solar screen fabrics to provide the perfect solution for each application. Color as well as openness of the fabric weave (1%, 3%, 5%, 10%) are central factors in a fabric’s performance, and work in concert with window orientation and size. Our fabric selections provide glare, UV and heat protection while allowing view-through.

### Why Choose Insolroll® Solar Shades?

**Solar screen shades block the sun but not the view.**

Insolroll® Shades are engineered to make your home more comfortable and energy efficient. Solar screen shades control the sun’s glare, heat, and UV rays while maintaining an open feeling.

Insolroll offers a wide range of solar screen fabrics to provide the perfect solution for each application. Color as well as openness of the fabric weave (1%, 3%, 5%, 10%) are central factors in a fabric’s performance, and work in concert with window orientation and size. Our fabric selections provide glare, UV and heat protection while allowing view-through.

### Choosing a solar screen fabric - sun control and view-through characteristics

**Light colored solar screen fabric**
- Excellent heat & UV reduction
- Light filtering with moderate view-through
- Moderate glare control

**Dark colored solar fabric**
- Excellent glare & UV reduction
- Excellent view-through
- Moderate heat reduction

**SilverScreen® high performance fabric**
- Excellent heat & glare control
- Excellent UV reduction
- Excellent view-through
**Insolroll Elements® Decorative Roller Shades**

*Textured fabrics in 5 opacity levels for your light control and privacy needs*

Where more privacy is needed, translucent and blackout fabrics make it happen. Translucent shades allow light to pass through, creating a glow in the room when the shades are down. Blackout shades block light where room-darkening is needed; perfect for media rooms, bedrooms, and anywhere nighttime privacy is desired.

**Choosing decorative fabric opacity - light and privacy characteristics**

- **Sheer fabrics**
  - Light filtering
  - Softened view-through
  - Objects and colors on the outside can be seen

- **Solar Screen fabrics**
  - Screen fabric with precise openness and technical properties
  - View-through varies with openness and color.

- **Translucent fabrics**
  - Light filtering
  - No view-through
  - Object shadows may be visible on the fabric

- **Semi-sheer fabrics**
  - Light filtering
  - Partial view-through
  - Objects on the outside are partially obscured

- **Blackout fabrics**
  - Opaque, with no view-through
  - Room darkening
  - Objects behind fabric are not visible
**Operation**

We are industry leaders in child-safety.
